Hyper War

How AI Is Revolutionizing Warfare

Jean-Michel Valantin

1st book on the geopolitical stakes represented by AI on a planetary scale in current and future conflicts. The title we've been waiting for on the decisive role of AI in the military field. Indispensable for understanding how AI will upset geopolitical balances of power and set up a central confrontation between China and the United States. Treats cognitive warfare as an integral component of modern warfare.

Kamala Harris

America of the Future

Jean-Éric Branaa

This updated biography introduces us to the roots and private life of Kamala Harris. A woman for whom family has always been fundamental, and whose childhood values have guided her entire career. A specialist in US politics, Jean-Éric Branaa paints an in-depth, never-before-published portrait of a woman who was long underestimated, before reaching the threshold of supreme power in the world's leading power.

Inside the Mind of Zinedine Zidane

Sabine Callegari

One of the most gifted players in the history of football, Zinedine Zidane is an enigma. Psychoanalyst Sabine Callegari offers us a brilliant and accessible psychic investigation of a genius mind. What drives him, his relationship with his father, his mother, and women... and the intimate drama that caused his July 2006 "coup de tête" during the World Cup Final.
